

Figure 12

FIG. 14 is a schematic diagram of a light source assembly 100. The assembly includes a light source 102, a dichroic filter 104, a phosphor 106, and a glass or plastic fiber 108. The light source 102 emits light 110, which passes through the dichroic filter 104. The dichroic filter 104 reflects light 112 and transmits light 114. The light 114 passes through the phosphor 106, which emits light 116. The light 116 is coupled into the glass or plastic fiber 108, which transmits light 118.
